# Sage ERP Accpac Version 6.0 New Features

See your business in a new way

As the world of business is constantly evolving, so must your business management software. At Sage, we work to continually improve your experience with Sage ERP Accpac and develop new functionality to help you get more out of your solution. Sage ERP Accpac Version 6.0 focuses on the functionality most requested by our customers, partners and the market. Improve productivity, envision success, and accelerate growth with exciting new tools, such as the new Portal to help you accomplish everyday tasks faster or the new Snapshots that provide secure access of key performance indicators. Version 6.0 also helps you get the information you need, faster! The new inquiry tool facilitates quick access to customized lists providing the answers you need to make better decisions. In addition, Version 6.0 can help you accelerate growth and lower total cost of ownership (TCO) with SageCRM Workflow Enhancements that improve information flow between the front and back office and changes to the management of fiscal periods.

We work directly with our extensive customer base to ensure our products work the way you do to improve processes. Led by dedicated User-Centric Design teams, we strive to understand not only how you interact with and utilise our software, but also how your business works and how we can help to solve your core business issues. Over the past year, over 800 partners and over 8000 customers and partners worldwide have been consulted through on-site visits, surveys, interviews, and observational studies in our state-of-the-art usability laboratories. The results of this rigorous research are poured into the product development process helping us to design and build better software.

Version 6.0 leverages the superior architecture of Sage ERP Accpac to begin our journey of delivering the next generation of ERP software harnessing the power of Web 2.0 technology to deliver a better user experience, lower total cost of ownership, and enhanced functionality. In this guide you will find an overview of the updates for Sage ERP Accpac Version 6.0. The key enhancements developed will help to See Your Business in a New Way!

Sage ERP Accpac Version 6.0 New Features

Top TEN Reasons to upgrade from Sage ERP Accpac Version 5.6 to 6.0

1. Enable collaboration and interoperability through new web technology that leverages the current superior architecture to minimize business interruption.

2. A global synchronized release of all modules keeps your system working together harmoniously.

3. Improve productivity with the Sage ERP Accpac Portal, providing faster, personalized role-based access to information so you can accomplish everyday tasks more quickly and focus on strategic projects.

4. Envision success with Sage ERP Accpac Snapshots, which provide secure access to key performance indicators for more proactive trend analysis.

5. Get the information you need, more quickly. Sage ERP Accpac Inquiry facilitates fast access to customized lists, providing the answers you need to make better decisions.

6. Accelerate growth and lower total cost of ownership with SageCRM Workflow Enhancements, which improve information flow between the front and back office.

7. Save time on month-end processes and reduce erroneous postings from individual modules to the general ledger through better management of fiscal periods.

8. Easily adopt new enhancements and get new employees up to speed more quickly and cost effectively with training and usability improvements like the Getting Started Snapshot.

9. Ensure optimal business management with SageCRM 7.0 (included) and Sage ERP Accpac Intelligence.

10. Adopt the new visual user interface at your own pace and ensure a smooth transition to web technology for your business.
