Sage Evolution

Sage Evolution

One of the most cost-effective ERP solutions.
Get back to basics with smart, cost-effective software for big businesses.

What is Sage Evolution Premium?

Sage Pastel Evolution takes accounting to the next level and is the choice application for business that outgrows their entry level applications.

Its powerful accounting engine employing both MS SQL and .NET technology allows greater flexibility in the core financials but its real strength is in its ability to manage operational tasks with workflow management and escalations.

This gives you the ability to control your finances as well as your relationships with your customers, suppliers and employees. In order to cater for vertical solution a purpose built

Key Features Detail:

• Transaction Drill Downs
Drill down functionality allows you to find exactly what you're looking for. From summarised information you can drill down to detailed transactions right down to source documents - with just a click of the mouse

• Inventory Control
Pastel Evolution's powerful Inventory module gives you unlimited control over your stock. The system provides both summary management reports as well as detailed operational reports, all customisable per user.

• Sales and Purchase Order Entry
You can maintain and control outstanding orders, processed orders and back orders. This module integrates fully into Evolution's Inventory, Receivables and Payables modules.

• Receivables and Payables
Pastel Evolution gives you instant access to customer and supplier balances, overdue totals and sales/purchases history. Drill down features and reports are available when you need a more detailed analysis of customer/ supplier transactions.

• Contact relationship Management
It is a powerful business tool that allows you to track, analyse and manage customer and supplier interactions within your business, allowing you to be proactive in meeting and exceeding their demands.

• Segmented General Ledger
If you have a complex and multi-dimensional General Ledger, you can create General Ledger accounts using multiple segments up to ten levels.
